

## Post-Treatment Instructions – Botox

1. Try to exercise your treated muscles for the first 30 minutes after treatment (e.g. practise frowning, raising your eyebrows or squinting). This helps to work the product into your muscles. Although this is thought to help, it will NOT impact your treatment negatively if you forget to do this.
2. Do NOT rub or massage the treated areas for 24 hours after your treatment. Do NOT do strenuous exercise for 4 hours after treatment. Also, avoid facials or saunas for 4 hours after your treatment. This will minimize the risk of raising your blood pressure and therefore minimize the risk of temporary bruising. Feel free to shower and go about most other regular daily activities.
3. Do NOT lie down for 4 hours after treatment. This is to avoid the risk of pressure on the treated areas (from your pillow) and to avoid the risk of having the area rubbed accidentally.
4. Be assured that any tiny bumps or marks will go away within a few hours after your treatment. If you need to apply make-up within 4 hours after your treatment, only use a GENTLE touch to avoid rubbing the treated area.
5. The results of your treatment can take up to 14 days to take full effect. Please wait until the 14 days have passed before assessing your treatment results.

**6. Our clinic needs to see you for a 2 week follow up with an assessment appointment.**  
**YES, \_\_\_ NO \_\_\_**

This will ensure Dr. Ledding can see how YOUR facial muscles reacted to your treatment. If you require more product to fine-tune/adjust your treatment results, it will be applied during this appointment at an additional cost. Alternatively, an additional product may not be required. For medical reasons, your results will be photographed and documented in your confidential patient file.

**Your 2 week assessment is booked for \_\_\_\_\_.**

### **Ledding Plastic Surgery**

Cornwall Professional Building

#314, 2125 11th Avenue, Regina, SK S4P 3X3

7. Because this treatment requires a special technique to customize the injections to your muscular structure, it is important that your muscle activity recovers BUT that your skin is not creasing to the point from where you started.
8. This treatment is a temporary procedure and at first, you may find that your treatment results will last approximately 3 or 4 months. If you maintain your treatment appointments with the frequency recommended by Dr. Ledding, the duration of each treatment result may last longer than 4 months
9. Initially, Dr. Ledding sees his patients between the 3 months (12 weeks) and 4 months (16 weeks) period. He can create the best clinical results for you during this period. If you allow the treatment to completely wear off, it is difficult for him to be able to see how your muscles reacted and therefore optimal results for your face are harder to achieve.

**10. Dr. Ledding will need to see you in \_\_\_\_\_ months. Please ensure you book this appointment before you leave our office today.**

**Your next appointment is booked for \_\_\_\_\_.**

We strive to fully satisfy our patients. We offer the special service of contacting you as a reminder before your booked appointment. If that date/time is not suitable, we will be more than happy to adjust it to fit your schedule. If you have any questions or concerns, please feel free to call us at **306-780-3650**.
